VANGUARD[®]

Advanced respiratory protection

Here's the first major breakthrough in canine hepatitis immunization since the first vaccines were introduced more than 25 years ago.

Norden's Vanguard utilizes an exclusive canine adenovirus type-2 isolate. In conferring immunity against basic adenovirus type-1 (hepatitis) infections, Vanguard also provides proven protection against adenovirus type-2 (respiratory) infections. These are characterized by pneumonia, tonsillitis, pharyngitis, bronchitis... commonly associated in the "canine cough" complex.

Hand in hand with this cross-protection, Norden Vanguard achieves a new level of safety. For example, post-vaccination incidence of "blue eye" is sometimes associated with adenovirus type-1 hepatitis vaccines. No Vanguard vaccine-related "blue eye" was found in tests involving more than 19,000 dogs. Even when 172 dogs were deliberately inoculated intravenously with vaccine virus, there was no sign of ocular lesions in any of the animals.

The Vanguard virus is non-oncogenic as demonstrated in comprehensive two-year tests by Norden researchers. The protocol for these tests was reviewed by the National Institutes of Health, and the results of these extensive tests were accepted by the

USDA. Other Norden tests showed the Vanguard virus did not produce kidney lesions, nor was there any evidence of reversion to virulence.

Vanguard is available now from your Norden branch as a replacement for our former Enduracell line.

BEEF**

You've got a kennelful of meat-lovers. And there's nothing more likely to make them grateful than adding some ALPO to their dry.

ALPO Beef Chunks Dinner gives them what most other dog foods don't. Lots of real beef, plus hearty meat by-products. Soy for better balance. And vitamins and minerals to complement the nutrition of your present feed. You can also serve it as a complete ration straight from the can. Either way, don't champions like yours deserve at least a little ALPO?

GOOD LUCK

in the Real World

The Unity of Creation

To need another and wiser and, perhaps a
more mystical concept of animals.
To patronize them for their incompleteness for
their tragic fate of having taken form so far
below ourselves.
And therein we err, and greatly err.
For the animal shall not be measured by man.
In a world older and more complete than ours,
they were finished and complete,
Gifted with extensions of the senses
We have lost or never attained,
Living by voices we shall never hear.
They are not brethren, they are not
underlings.
They are other nations, caught with ourselves
in the net of life and time;
Fellow prisoners of the splendors and travail
of the earth.

Tired
And Lonely.
So tired
The heart aches.
Meltwater trickles
Down the rocks.
The fingers are numb,
The knees tremble.
It is now
Now that you must not give in.

On the paths of others
Are resting places,
Places in the sun
Where they can meet.
But this
Is your path,
And it is now,
Now that you must not fail.

Weep,
If you can,
Weep,
But do not complain,
The way chose you
And you must be thankful.
